

Park Royal Office Furniture is based in Park Royal West London. Its core business is the supply and hire of new and used office furniture. Further services include surplus clearance and recycling of office furniture and equipment.

It is integral to the success of the business that waste sent to landfill is minimised and that new markets are found for commodities that would previously be classed as 'waste'. We therefore embrace any new outlets and/or working practice that allows us to profitably divert waste from landfill.

We at Park Royal Office Furniture are committed to:

- Complying with all legislation and regulatory requirements that pertains to a Company of our size and operating in the furniture reuse industry.
- Complying with and working towards certification of ISO14001:2004
- Continual review of working practices and equipment employed in the office recycling processes to reduce usage of non renewable resources, predominantly vehicle fuel and electricity.
- Communication internally and externally of our objectives and our progress towards attaining them to demonstrate our continual improvement.
- Working with staff, customers, suppliers and outside agencies to promote an awareness of our Environmental Management System (EMS).
- Continual environmental improvement and the prevention of pollution through the Environmental Management System.

John Bresnahan
General Manager
